Subject index*

A

Absorption, iron, in experimental achylia gastrica, effect of antigastric mucosal antibodies on, *46* (Abst.)
of reagin by human tissues in vitro, *46* (Abst.)

Achylia gastrica, experimental, effect of antigastric mucosal antibodies on iron absorption in, *46* (Abst.)

Acid, aminosalicylic, isoniazid, and streptomycin, experience with lymphocyte transformation tests in evaluation of allergy to, 105 (Abst.)
ellagic, antagonistic effect on histamine liberators, *20* (Abst.)

Acrylamide gel electrophoresis, studies of binding of timothy pollen antigen by sera and serum fractions of atopic individuals using (Lee et al.), 321

Adrenergic agents, effect on antibody response in vitro, 109 (Abst.)
beta-, blockade, manifestation; delayed recovery of blood glucose after insulin hypoglycemia in asthma, 110 (Abst.)
receptors, alpha, demonstration: human and guinea pig respiratory smooth muscle, 110 (Abst.)

Agammaglobulinemia, Swiss-type, in United States, *27* (Abst.)

Air conditioner, hypersensitivity pneumonitis due to contamination of, *8* (Abst.)

Airway(s), human, roentgenographic examination of, new contrast medium for: powdered tantalum, *5* (Abst.)
resistance in normal and asthmatic children, effect of intermittent positive-pressure breathing on, 90 (Abst.)

Alkaline proteinases, *B. subtilis*, nonimmunologic inhibition by human serum components, 98 (Abst.)

Allergen(s)-antibody systems related to ragweed allergy in man, heterogeneity of (Kisil et al.), 1
atopic, in hen's egg, studies on: identification of reactive fraction in egg white, *44* (Abst.)
binding to human peripheral leukocytes, 86 (Abst.)
(cod), major, characterization of (Elsayed and Aas), 283
Dermatophagoides, in house dust allergy in Baltimore area, significance: assay by leukocyte histamine release, 95 (Abst.)
extracts, effect of intensive regimens of injection with, in children on leukocyte sensitivity to antigenic histamine release, 119 (Abst.)
histamine, and methacholine in subjects with bronchial asthma, effect of disodium cromoglycate on inhalation challenge with, 96 (Abst.)

Allergenic extracts and bacterial vaccines, induction of interferon by (Singer and Hardegree), 117 (Abst.); 332

Allergic encephalomyelitis, experimental, prevention by combination of epinephrine and phenothiazine derivative propiomazine, *29* (Abst.)
manifestations, discordant, in monozygotic twins: genetic identity versus clinical, physiologic, and biochemical differences (Falliers et al.), 207
patients, to penicillins, differing patterns of wheal and flare skin reactivity in (Van Dellen et al.), 230
protein-losing gastroenteropathy: report of unusual case, *42* (Abst.)
reaction(s) to insulin, *36* (Abst.)
in man and other species, inhibition by cromoglycate, *4* (Abst.)
in ragweed asthma, where is, 108 (Abst.)

*January, pp. 1-58; February, pp. 59-120; March, pp. 121-186; April, pp. 187-246; May, pp. 247-308; June, p. 309-376.

Abstracts: January, pp. *1-8*; February, pp. *9-16*; March, pp. *17-24*; April, pp. *25-32*; May, pp. *33-40*; June, pp. *41-48*.

Allergic—Cont'd
thyroiditis, experimental, in rats: suppression by heterologous (rabbit) anitlymphocyte sera to lymph node, thymic, and splenic lymphocytes, *30* (Abst.)
Allograft rejection, renal, antilymphocyte serum preparations in treatment, *38* (Abst.)
Allpyral or Pollaccine, comparison of leukocyte sensitivity and levels of blocking antibody in hay fever subjects administered: studies in pollen allergy, *18* (Abst.)
American Academy of Allergy, Drug Committee, Double-blind study of Cromolyn Sodium sponsored by, 95 (Abst.)
Report of Penicillin Study Group, 93 (Abst.)
Aminosalicylic acid, isoniazid, and streptomycin, experience with lymphocyte transformation tests in evaluation of allergy to, 105 (Abst.)
Ampicillin, methicillin, and penicillin, interstitial nephritis due to, *10* (Abst.)
and other penicillins, drug rash with, *2* (Abst.)
reactions: clinical and immunologic evaluation, 92 (Abst.)
Anaphylactic reactions to IgA: difficult transfusion problem, *47* (Abst.)
shock, increased sensitivity to, in guinea pigs induced by prolonged treatment with epinephrine prior to challenge (Izard et al.), 309
Anaphylactoid reaction to technetium-99m sulfur colloid stabilized with gelatin, *3* (Abst.)
Anaphylaxis, guinea pig ileum, antigen dose-response relationships in, *39* (Abst.)
systemic, and Schultz-Dale reaction, discrepancies between, *23* (Abst.)
two lines of guinea pigs sensitive to chemical mediators and (Takino et al.), 247
Anemia, immune hemolytic, chlorpropamide-induced, *37* (Abst.)
pernicious, intrinsic-factor antibodies in absence of, *23* (Abst.)
Angioedema, life-threatening, treatment with purified kallikrein inhibitor and with fresh plasma, 103 (Abst.)
Angioneurotic edema, hereditary, histopathological and ultrastructural observations on tissues from patients with (Sheffer et al.), 292
iodide myxedema with facial swelling simulating (Swedlund), 341 (Brief communication)
Announcements, 56, 186
Antibiotics, penicillin and cephalosporin, macromolecular contaminants in (Walsh et al.), 159
Antibody(ies), allergen-, systems related to ragweed allergy in man, heterogeneity of (Kisil et al.), 1
antigastric mucosal, effect on iron absorption in experimental achylia gastrica, *46* (Abst.)
antigen-, complexes and eosinophilic leukocytes, 101 (Abst.)
blocking, comparison of leukocyte sensitivity and levels of, in hay fever subjects administered Allpyral or Pollaccine: studies in pollen allergy, *18* (Abst.)
reagin and, isolation by means of immunoadsorbent (Malley et al.), 131
formation, in vitro, x-ray resistant cell required for induction, *45* (Abst.)
glomerular-bound, elution in experimental streptococcal glomerulonephritis, *30* (Abst.)
intrinsic-factor, in absence of pernicious anemia, *23* (Abst.)
in nasal secretions and sera, effects of specific immunotherapy on, 114 (Abst.)
ragweed "blocking," detection by inhibition of ragweed-reagin–rat mast cell interaction: new test for "blocking" antibodies, 120 (Abst.)
reaginic, in monkeys, production following immunization with dialyzable constituents of timothy pollen extracts, *6* (Abst.)
response in vitro, effect of adrenergic agents on, 109 (Abst.)
systemic and secretory, of atopic and normal individuals to intranasally administered tetanus toxoid, 117 (Abst.)
in sera from tuberculous and nontuberculous individuals, measurement of binding of tubercle bacilli components by, 101 (Abst.)
smooth muscle, in bronchial asthma, *34* (Abst.)
studies, fluorescent, in three patients dying from honey bee sting, (Huang et al.), 198
to two common pesticides, DDT and Malathion, *19* (Abst.)
Antigen(s)-antibody complexes and eosinophilic leukocytes, 101 (Abst.)
Australia, in west of Scotland and north of England, *46* (Abst.)
bacterial, ^{3}H-thymidine uptake response of lymphocytes from patients with intrinsic asthma upon in vitro challenge with, 106 (Abst.)

Antigen—Cont'd
carrier, sensitization to, following delayed reactions to hapten, *13* (Abst.)
D immunotherapy in grass-sensitive patients, site of action, 111 (Abst.)
dose-response relationships in guinea pig ileum anaphylaxis, *39* (Abst.)
E, group I antigen, crude grass, and ragweed extracts, quantitative relationship between skin testing and leukocyte histamine release with, 103 (Abst.)
glomerular basement membrane, in human glomerluonephritis, in vitro evidence for cellular hypersensitivity to, *15* (Abst.)
hepatitis-associated, quantitation by electroimmunodiffusion (Merrill et al.), 315
neutralizing capacity, maximal, comparison of immediate "blocking" of antigenic release of histamine by serum with, 111 (Abst.)
persisting, role in development of immunological memory, *38* (Abst.)
-reactive cells, detectable circulating, lack during local immunization by food antigen, 106 (Abst.)
receptor molecules: inhibition by antiserum against kappa light chains, *29* (Abst.)
soluble, from malignant melanoma, in vitro lymphocyte stimulation by, *15* (Abst.)
timothy pollen, studies of binding by sera and serum fractions of atopic individuals using acrylamide gel electrophoresis (Lee et al.), 321
Antigenic, auto-, determinant groups in thyroid autoallergy, 99 (Abst.)
composition of *B. subtilis* enzyme preparations, 98 (Abst.)
histamine release, effect of intensive regimens of injection with allergen extracts in children on leukocyte sensitivity to, 119 (Abst.)
release of histamine by serum with maximal antigen neutralizing capacity, comparison of immediate "blocking" of, 111 (Abst.)
Antigenicity of defatted versus nondefatted pollen extracts, 94 (Abst.)
of fractions from extracts of *Candida albicans* (Kabe et al.), 59
of heat aggregated IgE, changes in, 85 (Abst.)
Antihistamine inhibition of allergy skin test, 94 (Abst.)
Antilymphocyte serum (sera), heterologous (rabbit), to lymph node, thymic, and splenic lymphocytes, suppression by: experimental allergic thyroiditis in rats, *30* (Abst.)
Antilymphocyte serum—Cont'd
preparations in treatment of renal allograft rejection, *38* (Abst.)
Antiserum (sera), inhibition by, against kappa light chains, antigen receptor molecules, *29* (Abst.)
from orally and parenterally immunized animals with pepsin- and pepsin-tyrpsin–digested food antigens, reactions of, 114 (Abst.)
Antitrypsin activity, alpha-1, simple technique for assaying, 89 (Abst.)
α_1, deficiency gene hererozygosity, obstructive lung disease and, *20* (Abst.)
Arrhythmia, cardiac, in child due to chloral hydrate ingestion, *28* (Abst.)
Arthritis, rheumatoid, eosinophilia in, *32* (Abst.)
Ascaris-infected individuals, immunological study, 116 (Abst.)
Aspirin intolerance, nasal polyps, and asthma, familial occurrence of, 115 (Abst.)
serum IgE and passive transfer in, 109 (Abst.)
Asthma, bronchial, effect of disodium cromoglycate on inhalation challenge with allergen, histamine, and methacholine in subjects with, 96 (Abst.)
smooth muscle antibody in, *34* (Abst.)
Candida albicans sensitivity and, 113 (Abst.)
chronic, oral versus inhaled corticosteroid for, *2* (Abst.)
delayed recovery of blood glucose after insulin hypoglycemia in: manifestation of beta-adrenergic blockade, 110 (Abst.)
differential diagnosis, and ciliocytophthoria, 101 (Abst.)
enzyme: occupational disease of laundry detergent workers, 97 (Abst.)
exercise, pharmacologic modulation of: role of Cromolyn Sodium, 96 (Abst.)
and hay fever, five-year prospective study of rural children with (Smith), 23
immunoglobulins in bronchial tissues from patients with, with special reference to immunoglobulin E (Callerame et al.), 187
immunosuppressive therapy of (Asmundsson et al.), 136
intestinal parasites in, 116 (Abst.)
intrinsic, ^{3}H-thymidine uptake response of lymphocytes from patients with, upon in vitro challenge with bacterial antigens, 106 (Abst.)
mouse: induction after pertussis vaccination, 90 (Abst.)

XUM

Asthma—Cont'd
nasal polyps, and aspirin intolerance, familial occurrence of, 115 (Abst.)
ragweed, where is allergic reaction in, 108 (Abst.)
treatment in residential center: fifteen-year study, *26* (Abst.)
xanthogranuloma of trachea presenting as, 102 (Abst.)
Asthmatic children, exercise-induced bronchospasm, ventilation, and blood gases in (Katz et al.), 148
nasal immunization of, with killed influenza virus (Newcomb and Eller), 220
fate of inhaled whole pollen in, 107 (Abst.)
and normal children, effect of intermittent positive-pressure breathing on airway resistance in, 90 (Abst.)
subjects free of symptoms for one to twenty-one years, bronchial sensitivity to methacholine in, 91 (Abst.)
pulmonary mechanics during bronchial provocation in, 91 (Abst.)
Asthmaticus, status, childhood, management of respiratory failure in: intravenous isoproterenol in lieu of mechanical ventilation, 112 (Abst.)
Atopic allergen in hen's egg, studies on: identification of reactive fraction in egg white, *44* (Abst.)
dermatitis and other eczematous conditions, neomycin sensitivity in, *3* (Abst.)
patients, serum histidine levels in, *10* (Abst.)
eczema, effect of catecholamines on DNA synthesis in epidermis from normal subjects and patients with, 109 (Abst.)
individuals, studies of binding of timothy pollen antigen by sera and serum fractions of, using acrylamide gel electrophoresis (Lee et al.), 321
and normal individuals, systemic and secretory antibody response of, to intranasally administered tetanus toxoid, 117 (Abst.)
Atopy, human, in vitro functions of lymphocytes in, 107 (Abst.)
Australia antigen in west of Scotland and north of England, *46* (Abst.)
Autoallergy, thyroid, autoantigenic determinant groups in, 99 (Abst.)

B

Bacillus subtilis alkaline proteinases, nonimmunologic inhibition by human serum components, 98 (Abst.)
Bacillus subtilis—Cont'd
enzyme dust, clinical, immunologic, and physiologic observations in factory workers exposed to (Franz et al.), 170
preparations, antigenic composition, 98 (Abst.)
Bacilli components, tubercle, measurement of binding of, by antibodies in sera from tuberculous and nontuberculous individuals, 101 (Abst.)
Bacterial antigens, ^{3}H-thymidine uptake response of lymphocytes from patients with intrinsic asthma upon in vitro challenge with, 106 (Abst.)
vaccines and allergenic extracts, induction of interferon by (Singer and Hardegree), 117 (Abst.); 332
Basement membrane antigens, glomerular, in human glomerulonephritis, in vitro evidence for cellular hypersensitivity to, *15* (Abst.)
Bermuda grass pollen, isolation and characterization of dialysate from, 100 (Abst.)
Blastomycosis, South American, impaired delayed hypersensitivity in patients with (Mendes and Raphael), 17
Blocking antibody, comparison of leukocyte sensitivity and levels of, in hay fever subjects administered Allpyral or Pollaccine: studies in pollen allergy, *18* (Abst.)
reagin and, isolation by means of immunoadsorbent (Malley et al.), 131
Blood gases, exercise-induced bronchospasm, and ventilation in asthmatic children (Katz et al.), 148
glucose, delayed recovery of, after insulin hypoglycemia in asthma: manifestation of beta-adrenergic blockade, 110 (Abst.)
Bradykinin inhibition by butylated hydroxyanisole, *11* (Abst.)
Breathing, intermittent positive-pressure, effect on airway resistance in normal and asthmatic children, 90 (Abst.)
Bronchial asthma, effect of disodium chromoglycate on inhalation challenge with allergen, histamine, and methacholine in subjects with, 96 (Abst.)
smooth muscle antibody in, *34* (Abst.)
provocation in asthmatic subjects, pulmonary mechanics during, 91 (Abst.)
sensitivity to methacholine in asthmatic subjects free of symptoms for one to twenty-one years, 91 (Abst.)

Bronchial—Cont'd
tissues from patients with asthma, immunoglobulins in, with special reference to immunoglobulin E (Callerame et al.), 187
Bronchospasm, exercise-induced, ventilation, and blood gases in asthmatic children (Katz et al.), 148

C

Candida albicans, antigenicity of fractions from extracts of (Kabe et al.), 59
sensitivity and asthma, 113 (Abst.)
Capillariosis, human intestinal: increased circulating IgE in new parasitic disease, *38* (Abst.)
Cardiac arrhythmia in child due to chloral hydrate ingestion, *28* (Abst.)
Castor bean *(Ricinus communis)*, primary respiratory allergy to, cross-reactivity in, *22* (Abst.)
Catecholamines, effect on DNA synthesis in epidermis from normal subjects and patients with atopic eczema, 109 (Abst.)
Cell(s), activated lymphoid, independence of: immune response in vitro, *21* (Abst.)
-mediated immunity shown by lymphocytes from respiratory tract, *14* (Abst.)
monkey mast, demonstration of sensitization, by IgE, 89 (Abst.)
rat mast, direct demonstration of human immunoglobulin E (IgE) on, after passive sensitization in vitro, 88 (Abst.)
ragweed-reagin-, interaction, detection of ragweed "blocking" antibodies by inhibition: new test for "blocking" antibodies, 120 (Abst.)
study on sensitization, with human IgE-type reagins, 88 (Abst.)
target, effect of concanavalin A–stimulated lymphoid cells on, 105 (Abst.)
transfer studies in immunosuppressed mice: role of macrophage, *21* (Abst.)
x-ray resistant, required for induction of in vitro antibody formation, *45* (Abst.)
Cephalosporin and penicillin antibiotics, macromolecular contaminants in (Walsh et al.), 159
Cellular and humoral immune mechanisms, guinea pig, effects of 6-mercaptopurine on, 100 (Abst.)
hypersensitivity to drugs, demonstration in vitro, 104 (Abst.)
Cellular hypersensitivity—Cont'd
to glomerular basement membrane antigens in human glomerulonephritis, in vitro evidence for, *15* (Abst.)
immune deficiency, late-onset hypogammaglobulinemia with, *35* (Abst.)
Chemical mediators and anaphylaxis, two lines of guinea pigs sensitive and nonsensitive to (Takino et al.), 247
Chemotaxis of eosinophils and neutrophils by aggregated immunoglobulins, 118 (Abst.)
Chloral hydrate ingestion, cardiac arrhythmia in child due to, *28* (Abst.)
Chlorpropamide-induced immune hemolytic anemia, *37* (Abst.)
Cigarette smoke, clinical hypersensitivity to, *28* (Abst.)
Ciliocytophthoria and differential diagnosis of asthma, 101 (Abst.)
Clotting changes, including disseminated intravascular coagulation, during rapid renal homograft rejection, *11* (Abst.)
Coagulation, disseminated intravascular, clotting changes including, during rapid renal homograft rejection, *11* (Abst.)
Cod, major allergen, characterization of (Elsayed and Aas), 283
Colloid, technitium-99m sulfur, stabilized with gelatin, anaphylacotoid reaction to, *3* (Abst.)
Concanavalin A–induced sensitization of mice to histamine, *36* (Abst.)
-stimulated lymphoid cells, effect on target cells, 105 (Abst.)
Contact dermatitis, pigmented, *34* (Abst.)
hypersensitivity, in vitro lymphocyte responses in, *42* (Abst.)
sensitivity in guinea pig, studies on ability of soluble proteins from skin, painted in vivo with DNFB, to cause, *18* (Abst.)
induction and recall in: changes in skin and draining lymph nodes of intact and thymectomized mice, *26* (Abst.)
Contrast medium, new, for roentgenographic examination of human airways: powdered tantalum, *5* (Abst.)
Correspondence, 84, 346
Corticosteroid, oral versus inhaled, for chronic asthma, *2* (Abst.)
topically administered, uveitis in association with, *48* (Abst.)
Cough syncope (Katz and Siegel), 346 (Correspondence)
Cow's milk β-lactoglobulin, gastrointestinal protein loss in allergy to, *43* (Abst.)

Cromoglycate, disodium, effect on inhalation challenge with allergen, histamine, and methacholine in subjects with bronchial asthma, 96 (Abst.)
inhibition of allergic reactions in man and other species by, *4* (Abst.)
Cromolyn sodium (disodium cromoglycate) (Falliers), 298 (Edit.)
double-blind study sponsored by Drug Committee of American Academy of Allergy, 95 (Abst.)
role of: pharmacologic modulation of exercise asthma, 96 (Abst.)
Culture rubella vaccine, canine tissue, in dog-sensitive children, 115 (Abst.)
Cutaneous vasculitis caused by griseofulvin, *40* (Abst.)
Cytotoxins in disease: autocytotoxins in lupus, *31* (Abst.)

D

DDT and malathion, two common pesticides, antibodies to, *19* (Abst.)
Dean, George A., 57 (Obit.)
Deficiency diseases, immunologic, in vitro lymphocyte response of patients with, *5* (Abst.)
Dermatitis, atopic, and other eczematous conditions, neomycin sensitivity in, *3* (Abst.)
patients, serum histidine levels in, *10* (Abst.)
contact, pigmented, *34* (Abst.)
Dermatophagoides allergens in house dust allergy in Baltimore area, significance: assay by leukocyte histamine release, 95 (Abst.)
Detergent(s), laundry, sensitivity to proteolytic enzymes in (Shapiro and Eisenberg), 76
workers, occupational disease of: enzyme asthma, 97 (Abst.)
sensitization to enzymes in (Lichtenstein et al.), 53 (Edit.)
Diabetes mellitus, juvenile, insulin resistance in: immunologic studies, *7* (Abst.)
Dialysate from Bermuda grass pollen, isolation and characterization of, 100 (Abst.)
Dialyzable constituents of timothy pollen extracts, production of reaginic antibody in monkeys following immunization with, *6* (Abst.)
Diethylcarbamazine citrate (Mallén), 84 (Correspondence)
Dinitrofluorobenzene (DNFB), studies on ability of soluble proteins from skin painted in vivo with, to cause contact sensitivity in guinea pig, *18* (Abst.)
Disease(s), cytotoxins in: autocytotoxins in lupus, *31* (Abst.)
Disease—Cont'd
immunologic deficiency, in vitro lymphocyte response of patients with, *5* (Abst.)
new parasitic, increased circulating IgE in: human intestinal capillariosis, *38* (Abst.)
obstructive lung, and α_1-antitrypsin deficiency gene heterozygosity, *20* (Abst.)
occupational, of laundry detergent workers: enzyme asthma, 97 (Abst.)
Disodium cromoglycate, effect on inhalation challenge with allergen, histamine, and methacholine in subjects with bronchial asthma, 96 (Abst.)
(cromolyn sodium) (Falliers), 298 (Edit.)
DNA synthesis in epidermis from normal subjects and patients with atopic eczema, effect of catecholamines on, 109 (Abst.)
Dose-response relationships, antigen, in guinea pig ileum anaphylaxis, *39* (Abst.)
Drug(s), cellular hypersensitivity to, demonstration in vitro, 104 (Abst.)
rash with ampicillin and other penicillins, *2* (Abst.)
therapy, pulmonary complications, *45* (Abst.)
Dust allergy, house, in Baltimore area, significance of Dermatophagoides allergens in: assay by leukocyte histamine release, 95 (Abst.)
pyroglyphid mites and (van Bronswijk and Sinha), 31
B. subtilis enzyme, clinical immunologic, and physiologic observations in factory workers exposed to (Franz et al.) 170
enzyme, preliminary investigations of sensitization phenomena in populations not exposed to high concentrations of, 97 (Abst.)
and mites, skin reactions to, *10* (Abst.)

E

Eczema, atopic, effect of catecholamines on DNA synthesis in epidermis from normal subjects and patients with, 109 (Abst.)
Eczematous conditions, atopic dermatitis and other, neomycin sensitivity in, *3* (Abst.)
Edema, angioneurotic, iodide myxedema with facial swelling simulating (Swedlund), 341 (Brief communication)
hereditary angioneurotic, histopathological and ultrastructural observations on tissues from patients with (Sheffer et al.), 292
Egg, hen's, studies on atopic allergen in: identification of reactive fraction in egg white, *44* (Abst.)

XUM

Electroimmunodiffusion, quantitation of hepatitis-associated antigen by (Merrill et al.), 351

Electrophoresis, acrylamide gel, studies of binding of timothy pollen antigen by sera and serum fractions of atopic individuals using (Lee et al.), 321

Ellagic acid, antagonistic effect on histamine liberators, *20* (Abst.)

Encephalomyelitis, experimental allergic prevention by combination of epinephrine and phenothiazine derivative propiomazine, *29* (Abst.)

Enteritis, eosinophilic: report of case without gastric involvement, *4* (Abst.)

Enzyme(s) asthma: occupational disease of laundry detergent workers, 97 (Abst.)

in detergents, sensitization to (Lichtenstein et al.), 53 (Edit.)

dust, *B. subtilis*, clinical, immunologic, and physiologic observations in factory workers exposed to (Franz et al.), 170

preliminary investigations of sensitization phenomena in populations not exposed to high concentrations of, 97 (Abst.)

preparations, *B. subtilis*, antigenic composition, 98 (Abst.)

Eosinophil(s) leukocyte chemotactic factors, 118 (Abst.)

and neutrophils, chemotaxis by aggregated immunoglobulins, 118 (Abst.)

Eosinophilia in rheumatoid arthritis, *32* (Abst.)

Eosinophilic enteritis: report of case without gastric involvement, *4* (Abst.)

leukocytes and antigen-antibody complexes, 101 (Abst.)

Epidermis from normal subjects and patients with atopic eczema, effect of catecholamines on DNA synthesis on, 109 (Abst.)

Epinephrine, increased sensitivity to anaphylactic shock in guinea pigs induced by prolonged treatment with, prior to challenge (Izard et al.), 309

and phenothiazine derivative propiomazine, prevention of experimental allergic encephalomyelitis by combination, *29* (Abst.)

Exercise asthma, pharmacologic modulation: role of Cromolyn Sodium, 96 (Abst.)

-induced bronchospasm, ventilation, and blood gases in asthmatic children (Katz et al.), 148

Extracts, allergen, effect of intensive regimens of injection with, in children on leukocyte sensitivity to antigenic histamine release, 119 (Abst.)

allergenic, and bacterial vaccines, induction of interferon by (Singer and Hardegree), 117 (Abst.); 332

defatted and nondefatted pollen, antigenicity of, 94 (Abst.)

ragweed, antigen E, group I antigen, and crude grass, quantitative relationship between skin testing and leukocyte histamine release with, 103 (Abst.)

F

Factory workers exposed to *B. subtilis* enzyme dust, clinical, immunologic, and physiologic observations in (Franz et al.), 170

Farmer's lung, immunofluorescent studies of lung in patients with, 102 (Abst.)

Flare, wheal and, skin reactivity, differing patterns of, in patients allergic to penicillins (Van Dellen et al.), 230

Fluoridation of community water supplies, statement on question of allergy to fluoride as used in (Austen et al.), 347 (Edit.)

Fluoride, statement on question of allergy to, as used in the fluoridation of community water supplies (Austen et al.), 347 (Edit.)

Food antigen, lack of detectable circulating antigen-reactive cells during local immunization by, 106 (Abst.)

skin test technique, provocative, evaluation, 104 (Abst.)

G

Gases, blood, ventilation, and exercise-induced bronchospasm in asthmatic children (Katz et al.), 148

Gastric, anti-, mucosal antibodies, effect on iron absorption in experimental achylia gastrica, *46* (Abst.)

involvement, report of case without: eosinophilic enteritis, *4* (Abst.)

Gastroenteropathy, allergic protein-losing: report of unusual case, *42* (Abst.)

Gastrointestinal protein loss in allergy to cow's milk β-lactoglobulin, *43* (Abst.)

Gel electrophoresis, acrylamide, studies of binding of timothy pollen antigen by sera and serum fractions of atopic individuals using (Lee et al.), 321

XUM

Gelatin, anaphylactoid reaction to technetium-99m sulfur colloid stabilized with, *3* (Abst.)

Gene heterozygosity, α_1-antitrypsin deficiency, obstructive lung disease and, *20* (Abst.)

Globulin deficiencies, selective gamma-G, in patients with recurrent pyogenic infections, 22 (Abst.)

Glomerular basement membrane antigens in human glomerulonephritis, in vitro evidence for cellular hypersensitivity to, *15* (Abst.)

-bound antibodies, elution in experimental streptococcal glomerulonephritis, *30* (Abst.)

Glomerulonephritis, experimental streptococcal, elution of glomerular-bound antibodies in, *30* (Abst.)

human, in vitro evidence for cellular hypersensitivity to glomerular basement membrane antigens in, *15* (Abst.)

Glucose, blood, delayed recovery of, after insulin hypoglycemia in asthma: manifestation of beta-adrenergic blockade, 110 (Abst.)

Grass, crude, antigen E, group I antigen, and ragweed extracts, quantitative relationship between skin testing and leukocyte histamine release with, 103 (Abst.)

pollen, Bermuda, isolation and characterization of dialysate from, 100 (Abst.)

-sensitive patients, site of action of antigen D immunotherapy in, 111 (Abst.)

Griseofulvin, cutaneous vasculitis caused by, *40* (Abst.)

H

Hageman factor, active, derivation of prekallikrein activators from, 118 (Abst.)

Hapten, sensitization of carrier antigens following delayed reactions to, *13* (Abst.)

Hay fever, asthma and, five-year prospective study of rural children with (Smith), 23

ragweed, maintenance immunotherapy in (Norman et al.), 273

subjects administered Allpyral or Pollaccine, comparison of leukocyte sensitivity and levels of blocking antibody in: studies in pollen allergy, *18* (Abst.)

Hemodynamics and lung function, effects on: continuous positive-pressure ventilation in acute respiratory failure, *44* (Abst.)

Hemolytic anemia, immune, chlorpropamide-induced, *37* (Abst.)

Hepatitis-associated antigen, quantitation by electroimmunodiffusion (Merrill et al.), 315

Hereditary angioneurotic edema, histopathological and ultrastructural observations on tissues from patients with (Sheffer et al.), 292

Heterogeneity of allergen-antibody systems related to ragweed allergy in man (Kisil et al.), 1

Heterozygosity, α_1-antitrypsin deficiency gene, obstructive lung disease and, 20 (Abst.)

Histamine, allergen, and methacholine in subjects with bronchial asthma, effect of disodium cromoglycate on inhalation challenge with, 96 (Abst.)

antigenic release of, by serum with maximal antigen neutralizing capacity, comparison of immediate "blocking" of, 111 (Abst.)

concanavalin A–induced sensitization of mice to, *36* (Abst.)

in human leukocytes, distribution and releasability of, 119 (Abst.)

liberators, antagonistic effect of ellagic acid on, *20* (Abst.)

release, antigenic, effect of intensive regimens of injection with allergen extracts in children on leukocyte sensitivity to, 119 (Abst.)

leukocyte, assay by: significance of Dermatophagoides allergens in house dust allergy in Baltimore area, 95 (Abst.)

with antigen E, group I antigen, crude grass, and ragweed extracts, quantitiative relationship between skin testing and, 103 (Abst.)

of penicillin-sensitive individuals, studies on, *19* (Abst.)

Histidine levels, serum, in atopic dermatitis patients, *10* (Abst.)

Homograft, renal, rapid rejection, clotting changes, including disseminated intravascular coagulation during, *11* (Abst.)

Honey bee sting, fluorescent antibody studies in three patients dying from (Huang et al.), 198

Humidifier, home, hypersensitivity pneumonitis due to contamination of, 113 (Abst.)

Humidity and allergy, control in secretory otitis media of children: analysis, *16* (Abst.)

Hydroxyanisole, butylated, bradykinin inhibition by, *11* (Abst.)

Hyperimmunoglobulinemia E, extreme, and undue susceptibility to infection, 108 (Abst.)

Hypersensitivity, cellular, to glomerular basement membrane antigens in human glomerulonephritis, in vitro evidence for, *15* (Abst.)
clinical, to cigarette smoke, *28* (Abst.)
contact, in vitro lymphocyte responses in, *42* (Abst.)
delayed, elusive humors of lymphocyte mediators of (David), 237
to drugs, cellular, demonstration in vitro, 104 (Abst.)
impaired delayed, in patients with South American blastomycosis (Mendes and Raphael), 17
phylogeny of: anaphylactic responsiveness of frog, *Rana pipiens* (Cohen et al.), 121
pneumonitis due to contamination of air conditioner, *8* (Abst.)
home humidifier, 113 (Abst.)
reactions, delayed-type, lungs as site in guinea pigs (Miyamoto and Kabe), 181 (Brief communication)
tuberculin, in vitro lymphocyte reactivity during depression by 6-mercaptopurine, *13* (Abst.)
Hypogammaglobulinemia, late-onset, with cellular immune deficiency, *35* (Abst.)
Hypoglycemia, insulin, in asthma, delayed recovery of blood glucose after: manifestation of beta-adrenergic blockade, 110 (Abst.)

I

Ileum anaphylaxis, guinea pig, antigen dose-response relationships in, *39* (Abst.)
Immune deficiency, cellular, late-onset hypogammaglobulinemia with, *35* (Abst.)
hemolytic anemia, chlorpropamide-induced, *37* (Abst.)
mechanisms, cellular and humoral, guinea pig, effects of 6-mercaptopurine on, 100 (Abst.)
naturally, and vaccinated persons, exposed in epidemic, reinfection of: rubella, *37* (Abst.)
response in vitro: independence of activated lymphoid cells, *21* (Abst.)
Immunity, cell-mediated, shown by lymphocytes from respiratory tract, *14* (Abst.)
Immunization with dialyzable constituents of timothy pollen extracts, production of reaginic antibody in monkeys following, *6* (Abst.)
local, by food antigen, lack of detectable circulating antigen-reactive cells during, 106 (Abst.)
Immunization—Cont'd
nasal, of asthmatic children with killed influenza virus (Newcomb and Eller), 220
of rabbits with human thyroglobulin and human and rabbit thyroid microsomal fractions, comparative effects of, 99 (Abst.)
Immunized animals, orally and parenterally, reactions of antisera from, with pepsin- and pepsin-trypsin–digested food antigens, 114 (Abst.)
Immunoadsorbent, isolation of reagin and blocking antibody by means of (Malley et al.), 131
Immunofluorescent studies of lung in patients with farmer's lung, 102 (Abst.)
Immunoglobulin(s) A (IgA), anaphylactic reactions to: difficult transfusion problem, *47* (Abst.)
aggregated, chemotaxis of eosinophils and neutrophils by, 118 (Abst.)
in bronchial tissues from patients with asthma, with special reference to immunoglobulin E (Callerame et al.), 187
E (IgE) concentrations, serum and nasal, seasonal changes in, 87 (Abst.)
value in practice of allergy, 87 (Abst.)
year-round study of 86 (Abst.)
demonstration of passive sensitization of monkey mast cells by, 89 (Abst.)
heat aggregated, changes in, 85 (Abst.)
human, direct demonstration on rat mast cells after passive sensitization in vitro, 88 (Abst.)
increased circulating, in new parasitic disease: human intestinal capillariosis, *38* (Abst.)
new method for measuring, 85 (Abst.)
serum, and passive transfer in aspirin intolerance, 109 (Abst.)
studies on levels of immunoglobulins in normal human urine with particular reference to, *12* (Abst.)
–type reagins, human, study on sensitization of rat mast cells with, 88 (Abst.)
in nasal polyp fluid, *24* (Abst.)
secretions of infants, *31* (Abst.)
Immunological and clinical evaluation: ampicillin reactions, 92 (Abst.)
and physiologic observations in factory workers exposed to *B. subtilis* enzyme dust (Franz et al.), 170
studies of ragweed immunotherapy (Melam et al.), 262
deficiency diseases, in vitro lymphocyte response of patients with, *5* (Abst).

Immunological—Cont'd
memory, role of persisting antigen in development, *38* (Abst.)
non-, inhibition of *B. subtilis* alkaline proteinases by human serum components, 98 (Abst.)
study(ies) of Ascaris-infected individuals, 116 (Abst.)
insulin resistance in juvenile diabetes mellitus, 7 (Abst.)
target organ, lung as: experimental results in rabbit and guinea pig, 92 (Abst.)
Immunosuppressed mice, cell transfer studies in, role of macrophage, *21* (Abst.)
Immunosuppressive therapy of asthma (Asmundsson et al.), 136
Immunotherapy, antigen D, in grass-sensitive patients, site of action, 111 (Abst.)
maintenance, in ragweed hay fever (Norman et al.), 273
ragweed, clinical and immunologic studies (Melam et al.), 262
specific, effects on antibodies in nasal secretions and sera, 114 (Abst.)
Infection(s), recurrent pyogenic, selective gamma-G globulin deficiencies in patients with, *22* (Abst.)
undue susceptibility to, hyperimmunoglobulinemia E and, 108 (Abst.)
Influenza virus, killed, nasal immunization of asthmatic children with (Newcomb and Eller), 220
Injection with allergen extracts in children, effect of intensive regimens of, on leukocyte sensitivity to antigenic histamine release, 119 (Abst.)
Inhalation challenge with allergen, histamine, and methacholine in subjects with bronchial asthma, effect of disodium cromoglycate on, 96 (Abst.)
Insulin, allergic reactions to, 36 (Abst.)
hypoglycemia in asthma, delayed recovery of blood glucose after: manifestation of beta-adrenergic blockade, 110 (Abst.)
resistance in juvenile diabetes mellitus: immunologic studies, 7 (Abst.)
Interferon, induction by bacterial vaccines and allergenic extracts (Singer and Hardegree), 117 (Abst.); 332
Interstitial nephritis due to methicillin, penicillin, and ampicillin, *10* (Abst.)
Intestinal capillariosis, human: increased circulating IgE in new parasitic disease, *38* (Abst.)
parasites in asthma, 116 (Abst.)
Intrinsic-factor antibodies in absence of pernicious anemia, *23* (Abst.)
Iodide myxedema with facial swelling simulating angioneurotic edema (Swedlund), 341 (Brief communication)
Iron absorption in experimental achylia gastrica, effect of antigastric mucosal antibodies on, *46* (Abst.)
Isoniazid, streptomycin, and aminosalicylic acid, experience with lymphocyte transformation tests in evaluation of allergy to, 105 (Abst.)
Isoproterenol, intravenous, in lieu of mechanical ventilation: management of respiratory failure in childhood status asthmaticus, 112 (Abst.)

K

Kallikrein inhibitor, purified, and fresh plasma, treatment of life-threatening angioedema with, 103 (Abst.)
pre-, activators from active Hageman factor, derivation, 118 (Abst.)

L

Lactoglobulin, β-, cow's milk, gastrointestinal protein loss in allergy to, *43* (Abst.)
Leukocyte(s) chemotactic factors, eosinophil, 118 (Abst.)
-eosinophilic, and antigen-antibody complexes, 101 (Abst.)
histamine release with antigen E, group I antigen, crude grass, and ragweed extracts, quantitative relationship between skin testing and, 103 (Abst.)
assay by: significance of Dermatophagoides allergens in house dust allergy in Baltimore area, 95 (Abst.)
human, distribution and releasibility of histamine in, 119 (Abst.)
peripheral, allergen binding to, 86 (Abst.)
of penicillin-sensitive individuals, studies on histamine release from, *19* (Abst.)
sensitivity to antigenic histamine release, effect of intensive regimens of injection with allergen extracts in children on, 119 (Abst.)
and levels of blocking antibody in hay fever subjects administered Allpyral or Pollaccine: studies in pollen allergy, *18* (Abst.)
Lipomatosis, steroid-induced mediastinal, *8* (Abst.)
Lung(s) diseases, obstructive, and α_1-antitrypsin deficiency gene heterozygosity, *20* (Abst.)

Lung(s)—Cont'd
function and hemodynamics, effects on: continuous positive-pressure ventilation in acute respiratory failure, *44* (Abst.)
as immunologic target organ: experimental results in rabbit and guinea pig, 92 (Abst.)
in patients with farmer's lung, immunofluorescent studies of, 102 (Abst.)
response to 6 to 12 hours of 100 per cent oxygen inhalation in normal man, *12* (Abst.)
as site of delayed-type hypersensitivity reactions in guinea pigs (Miyamoto and Kabe), 181 (Brief communication)

Lupus, autocytotoxins in: cytotoxins in disease, *31* (Abst.)

Lymph node(s), draining, and skin, of intact and thymectomized mice, changes in: induction and recall in contact sensitivity, *26* (Abst.)
thymic, and splenic lymphocytes, suppression by heterologous (rabbit) antilymphocyte sera to: experimental allergic thyroiditis in rats, *30* (Abst.)

Lymphocyte(s) in human atopy, in vitro functions, 107 (Abst.)
lymph node, thymic, and splenic, suppression by heterologous (rabbit) antilymphocyte sera to: experimental allergic thyroiditis in rats, *30* (Abst.)
mediators of delayed hypersensitivity, elusive humors of (David), 237
from patients with intrinsic asthma upon in vitro challenge with bacterial antigens, ^{3}H-thymidine uptake response of, 106 (Abst.)
reactivity, in vitro, during depression of tuberculin hypersensitivity by 6-mercaptopurine, *13* (Abst.)
from respiratory tract, cell-mediated immunity by, *14* (Abst.)
response(s) in contact hypersensitivity, in vitro, *42* (Abst.)
in vitro, of patients with immunologic deficiency diseases, *5* (Abst.)
stimulation, in vitro, by soluble antigen from malignant melanoma, *15* (Abst.)
transformation tests, experience with in evaluation of allergy to aminosalicylic acid, isoniazid, and streptomycin, 105 (Abst.)

Lymphoid cells, activated, independence of: immune response in vitro, *21* (Abst.)
concanavalin A–stimulated, effect on target cells, 105 (Abst.)

M

Macromolecular contaminants in penicillin and cephalosporin antibiotics (Walsh et al.), 159

Macrophage, role: cell transfer studies in immunosuppressed mice, *21* (Abst.)

Malathion and DDT, two common pesticides, antibodies to, *19* (Abst.)

Malignant melanoma, in vitro stimulation by soluble antigen from, *15* (Abst.)

Mast cell(s), monkey, demonstration of sensitization, by IgE, 89 (Abst.)
rat, direct demonstration of human immunoglobulin E (IgE) on, after passive sensitization in vitro, 88 (Abst.)
ragweed-reagin–, interaction, detection of ragweed "blocking" antibodies by inhibition: new test for "blocking" antibodies, 120 (Abst.)
study of sensitization, with human IgE-type reagins, 88 (Abst.)

Mediastinal lipomatosis, steroid-induced, *8* (Abst.)

Melanoma, malignant, in vitro stimulation by soluble antigen from, *15* (Abst.)

Membrane antigens, glomerular basement, in human glomerulonephritis, in vitro evidence for cellular hypersensitivity to, *15* (Abst.)

Mercaptopurine, 6-, effects on guinea pig cellular and humoral immune mechanisms, 100 (Abst.)
in vitro lymphocyte reactivity during depression of tuberculin hypersensitivity by, *13* (Abst.)

Methacholine, allergen, and histamine in subjects with bronchial asthma, effect of disodium cromoglycate on inhalation challenge with 96 (Abst.)
bronchial sensitivity to, in asthmatic subjects free of symptoms for one to twenty-one years, 91 (Abst.)

Methicillin, penicillin, and ampicillin, interstitial nephritis due to, *10* (Abst.)

Milk, β-lactoglobulin cow's, gastrointestinal protein loss in allergy to, *43* (Abst.)

Mites and dust, skin reactions to, *10* (Abst.)

Mites, pyroglyphid (Acari), and house dust allergy (van Bronswijk and Sinha), 31

Monozygotic twins, discordant allergic manifestations in: genetic identity versus clinical, physiologic, and biochemical differences (Falliers et al.), 207

XUM

Mucosal antibodies, antigastric, effect on iron absorption in experimental achylia gastrica, *46* (Abst.)
Muscle, respiratory smooth, human and guinea pig: demonstration of alpha adrenergic receptors, 110 (Abst.)
smooth, antibody, in bronchial asthma, *34* (Abst.)
Myxedema, iodide, with facial swelling simulating angioneurotic edema (Swedlund), 341 (Brief communication)

N

Nasal immunization of asthmatic children wth killed influenza virus (Newcomb and Eller), 220
polyp(s), asthma, and aspirin intolerance, familial occurrence of, 115 (Abst.)
fluid, immunoglobulins in, *24* (Abst.)
secretions of infants, immunoglobulins in, *31* (Abst.)
and sera, effects of specific immunotherapy on antibodies in, 114 (Abst.)
and serum IgE concentrations, seasonal changes in, 87 (Abst.)
Neomycin sensitivity in atopic dermatitis and other eczematous conditions, *3* (Abst.)
Nephritis, interstitial, due to methicillin, penicillin, and ampicillin, *10* (Abst.)
Neutrophils and eosinophils, chemotaxis by aggregated immunoglobulins, 118 (Abst.)

O

Obituaries
Cohen, Armand Earl, 306
Dean, George A., 57
Goltman, David W., 307
Guill, Russell Edward, 307
Lamas, Josefina L., 308
Porkorny, Norman, 306
Obstructive lung disease and α_1-antitrypsin deficiency gene heterozygosity, *20* (Abst.)
Otitis media, secretory, of children, control of allergy and humidity in, *16* (Abst.)
Oxygen inhalation, in normal man, 100 per cent, response of lung to 6 to 12 hours of, *12* (Abst.)

P

Parasites, intestinal, in asthma, 116 (Abst.)
Parasitic disease, new, increased circulating IgE in: human intestinal capillariosis, *38* (Abst.)
Pediatricians' attitudes toward allergy (Slavin et al.), 80 (Brief communication)
Penicillin(s), ampicillin, and methicillin, interstitial nephritis due to, *10* (Abst.)
and other, drug rash with, *2* (Abst.)
and cephalosporin antibiotics, macromolecular contaminants in (Walsh et al.), 159
differing patterns of wheal and flare skin reactivity in patients allergic to (Van Dellen et al.), 230
sensitive individuals, studies on histamine release from leukocytes of, *19* Abst.)
Study Group, report: American Academy of Allergy, 93 (Abst.)
Pepsin- and pepsin-trypsin–digested food antigens, reactions of antisera from orally and parenterally immunized animals with, 114 (Abst.)
Pernicious anemia, intrinsic-factor antibodies in absence of, *23* (Abst.)
Pertussis vaccination, induction of mouse asthma after, 90 (Abst.)
Pesticides, two common, DDT and Malathion, antibodies to, *19* (Abst.)
Phenothiazine derivative propiomazine, combination of epinephrine and, prevention of experimental allergic encephalomyelitis by, *29* (Abst.)
Phylogeny of hypersensitivity: anaphylactic responsiveness of frog, *Rana pipiens* (Cohen et al.), 121
Pigeon breeders, epidemiologic survey, 112 (Abst.)
Plasma, fresh, and purified kallikrein inhibitor, treatment of life-threatening angioedema with, 103 (Abst.)
Pneumonitis, hypersensitivity, due to contamination of air conditioner, *8* (Abst.)
home humidifier, 113 (Abst.)
Pollaccine or Allpyral, comparison of leukocyte sensitivity and levels of blocking antibody in hay fever subjects administered: studies in pollen allergy, *18* (Abst.)
Pollen allergy, studies in: comparison of leukocyte sensitivity and levels of blocking antibody in hay fever subjects administered Allpyral or Pollaccine, *18* (Abst.)
antigen, timothy, studies of binding by sera and serum fractions of atopic individuals using acrylamide gel electrophoresis (Lee et al.), 321
Bermuda grass, isolation and characterization of dialysate from, 100 (Abst.)

XUM

Pollen—Cont'd
extracts, defatted and nondefatted, antigenicity of, 94 (Abst.)
timothy, dialyzable constituents of, production of reaginic antibody in monkeys following immunization with, *6* (Abst.)
inhaled whole, fate in asthmatics, 107 (Abst.)
Polyp(s) fluid, nasal, immunoglobulins in, *24* (Abst.)
nasal, asthma, and aspirin intolerance, familial occurrence of, 115 (Abst.)
Pressure, positive-, breathing, intermittent, effect on airway resistance in normal and asthmatic children 90 (Abst.)
Propiomazine, phenothiazine derivative, combination of epinephrine and, prevention of experimental allergic encephalomyelitis by, *29* (Abst.)
Protein(s)-losing gastroenteropathy, allergic: report of unusual case, *42* (Abst.)
loss, gastrointestinal, in allergy to cow's milk β-lactoglobulin, *43* (Abst.)
souble, from skin, painted in vivo with DNFB, studies on ability to cause contact sensitivity in guinea pig, *18* (Abst.)
Proteinases, *B. subtilis* alkaline, nonimmunologic inhibition by human serum components, 98 (Abst.)
Proteolytic enzymes in laundry detergents, sensitivity to (Shapiro and Eisenberg), 76
Pulmonary complications on drug therapy, *45* (Abst.)
mechanics during bronchial provocation in asthmatic subjects, 91 (Abst.)
Pyogenic infections, recurrent, selective gamma-G globulin deficiencies in patients with, *22* (Abst.)
Pyroglyphid mites (Acari) and house dust allergy (van Bronswijk and Sinha), 31

R

Ragweed allergy in man, heterogeneity of allergen-antibody systems related to (Kisil et al.), 1
asthma, where is allergic reaction in, 108 (Abst.)
"blocking" antibodies, detection by inhibition of ragweed-reagin–rat mast cell interaction: new test for "blocking" antibodies, 120 (Abst.)
extracts, antigen E, group I antigen, and crude grass, quantitative relationship between skin testing and leukocyte histamine release with, 103 (Abst.)
Ragweed—Cont'd
hay fever, maintenance immunotherapy in (Norman et al.), 273
immunotherapy, clinical and immunologic studies (Melam et al.), 262
Rana pipiens, frog, anaphylactic responsiveness: phylogeny of hypersensitivity (Cohen et al.), 121
Rash, drug, with ampicillin and other penicillins, *2* (Abst.)
Reaction(s), allergic, to insulin, *36* (Abst.)
in man and other species, inhibition by cromoglycate, *4* (Abst.)
in ragweed asthma, where is, 108 (Abst.)
ampicillin: clinical and immunologic evaluation, 92 (Abst.)
anaphylactic, to IgA: difficult transfusion problem, *47* (Abst.)
anaphylactoid, to technetium-99m sulfur colloid stabilized with gelatin, *3* (Abst.)
of antisera from orally and parenterally immunized animals with pepsin- and pepsin-trypsin–digested food antigens, 114 (Abst.)
delayed, to hapten, sensitization to carrier antigens following, *13* (Abst.)
-type hypersensitivity, lungs as site in guinea pigs Miyamoto and Kabe), 181 (Brief communication)
Schultz-Dale, discrepancies between systemic anaphylaxis and, *23* (Abst.)
skin, to dust and mites, *10* (Abst.)
Reactive, antigen-, cells, detectable circulating, lack during local immunization by food antigen, 106 (Abst.)
Reactivity, cross-, in primary respiratory allergy to castor bean *(Ricinus communis)*, *22* (Abst.)
lymphocyte, in vitro, during depression of tuberculin hypersensitivity by 6-mercaptopurine, *13* (Abst.)
skin, wheal and flare, differing patterns of, in patients allergic to penicillins (Van Dellen et al.), 230
Reagin, absorption by human tissues in vitro, *46* (Abst.)
and blocking antibody, isolation by means of immunoadsorbent (Malley et al.), 131
ragweed-, –rat mast cell interaction, detection of ragweed "blocking" antibodies by inhibition: new test for "blocking" antibodies, 120 (Abst.)
Reaginic antibody in monkeys, production following immunization with dialyzable constituents of timothy pollen extracts, *6* (Abst.)
Renal allograft rejection, antilymphocyte serum preparations in treatment of, *38* (Abst.)

XUM

Renal—Cont'd
homograft rejection, rapid, clotting changes, including disseminated intravascular coagulation during, *11* (Abst.)
Respiratory allergy, primary, to castor bean (*Ricinus communis*), *22* (Abst.)
failure, acute, continuous positive-pressure ventilation in: effects of hemodynamics and lung function, *44* (Abst.)
in childhood status asthmaticus, management: intravenous isoproterenol in lieu of mechanical ventilation, 112 (Abst.)
smooth muscle, human and guinea pig: demonstration of alpha adrenergic receptors, 110 (Abst.)
tract, cell-mediated immunity shown by lymphocytes from, *14* (Abst.)
Response(s), antibody, in vitro, effect of adrenergic agents on, 109 (Abst.)
dose-, relationships, antigen, in guinea pig ileum anaphylaxis, *39* (Abst.)
immune, in vitro: independence of activated lymphoid cells, *21* (Abst.)
in vitro lymphocyte, in contact hypersensitivity, *42* (Abst.)
of patients with immunologic deficiency diseases, *5* (Abst.)
of lung to 6 to 12 hours of 100 per cent oxygen inhalation in normal man, *12* (Abst.)
systemic and secretory antibody, of atopic and normal individuals to intranasally administered tetanus toxoid, 117 (Abst.)
^{3}H-thymidine uptake, of lymphocytes from patients with intrinsic asthma upon in vitro challenge with bacterial antigens, 106 (Abst.)
Responsiveness, anaphylactic, of frog, *Rana pipiens*: phylogeny of hypersensitivity (Cohen et al.), 121
Rheumatoid arthritis, eosinophilia in, *32* (Abst.)
Ricinus communis, castor bean, cross-reactivity in primary respiratory allergy to, *22* (Abst.)
Roentgenographic examination of human airways, new contrast medium for: powdered tantalum, *5* (Abst.)
Rubella: reinfection of vaccinated and naturally immune persons exposed in an epidemic, *37* (Abst.)
vaccine, canine tissue culture, in dog-sensitive children, 115 (Abst.)

S

Schultz-Dale reaction, discrepancies between systemic anaphylaxis and, *23* (Abst.)
Secretions, nasal, of infants, immunoglobulins in, *31* (Abst.)
and sera, effects of specific immunotherapy on antibodies in, 114 (Abst.)
Secretory otitis media of children, control of allergy and humidity in: analysis, *16* (Abst.)
and systemic antibody response of atopic and normal individuals to intranasally administered tetanus toxoid, 117 (Abst.)
Sensitive, dog-, children, canine tissue culture rubella vaccine in, 115 (Abst.)
grass-, patients site of action of antigen D immunotherapy in, 111 (Abst.)
and nonsensitive to chemical mediators and anaphylaxis, two lines of guinea pigs (Takino et al.), 247
penicillin-, individuals, studies on histamine release from leukocytes of, *19* (Abst.)
Sensitivity, bronchial, to methacholine in asthmatic subjects free of symptoms for one to twenty-one years, 91 (Abst.)
Candida albicans, and asthma, 113 (Abst.)
contact, in guinea pig, studies on ability of soluble proteins from skin, painted in vivo with DNFB, to cause, *18* (Abst.)
induction and recall in: changes in skin and draining lymph nodes of intact and thymectomized mice, *26* (Abst.)
increased, to anaphylactic shock in guinea pigs induced by prolonged treatment with epinephrine prior to challenge (Izard et al.), 309
leukocyte, to antigenic histamine release, effect of intensive regimens of injection with allergen extracts in children on, 119 (Abst.)
and levels of blocking antibody in hay fever subjects administered Allpyral or Pollacine, comparison: studies in pollen allergy, *18* (Abst.)
neomycin, in atopic dermatitis and other eczematous conditions, *3* (Abst.)
to proteolytic enzymes in laundry detergents (Shapiro and Eisenberg), 76
Sensitization to carrier antigens following delayed reactions to hapten, *13* (Abst.)
to enzymes in detergents (Lichtenstein et al.), 53 (Edit.)
of mice to histamine, concanavalin A–induced, *36* (Abst.)
of monkey mast cells by IgE, demonstration, 89 (Abst.)
passive, in vitro, direct demonstration of human immunoglobulin E (IgE) on rat mast cells after, 88 (Abst.)

Pollen—Cont'd
extracts, defatted and nondefatted, antigenicity of, 94 (Abst.)
timothy, dialyzable constituents of, production of reaginic antibody in monkeys following immunization with, *6* (Abst.)
inhaled whole, fate in asthmatics, 107 (Abst.)
Polyp(s) fluid, nasal, immunoglobulins in, *24* (Abst.)
nasal, asthma, and aspirin intolerance, familial occurrence of, 115 (Abst.)
Pressure, positive-, breathing, intermittent, effect on airway resistance in normal and asthmatic children 90 (Abst.)
Propiomazine, phenothiazine derivative, combination of epinephrine and, prevention of experimental allergic encephalomyelitis by, *29* (Abst.)
Protein(s)-losing gastroenteropathy, allergic: report of unusual case, *42* (Abst.)
loss, gastrointestinal, in allergy to cow's milk β-lactoglobulin, *43* (Abst.)
souble, from skin, painted in vivo with DNFB, studies on ability to cause contact sensitivity in guinea pig, *18* (Abst.)
Proteinases, *B. subtilis* alkaline, nonimmunologic inhibition by human serum components, 98 (Abst.)
Proteolytic enzymes in laundry detergents, sensitivity to (Shapiro and Eisenberg), 76
Pulmonary complications on drug therapy, *45* (Abst.)
mechanics during bronchial provocation in asthmatic subjects, 91 (Abst.)
Pyogenic infections, recurrent, selective gamma-G globulin deficiencies in patients with, *22* (Abst.)
Pyroglyphid mites (Acari) and house dust allergy (van Bronswijk and Sinha), 31

Ricinus communis, castor bean, cross-reactivity in primary respiratory allergy to, *22* (Abst.)
Roentgenographic examination of human airways, new contrast medium for: powdered tantalum, *5* (Abst.)
Rubella: reinfection of vaccinated and naturally immune persons exposed in an epidemic, *37* (Abst.)
vaccine, canine tissue culture, in dog-sensitive children, 115 (Abst.)

S

Schultz-Dale reaction, discrepancies between systemic anaphylaxis and, *23* (Abst.)
Secretions, nasal, of infants, immunoglobulins in, *31* (Abst.)
and sera, effects of specific immunotherapy on antibodies in, 114 (Abst.)
Secretory otitis media of children, control of allergy and humidity in: analysis, *16* (Abst.)
and systemic antibody response of atopic and normal individuals to intranasally administered tetanus toxoid, 117 (Abst.)
Sensitive, dog-, children, canine tissue culture rubella vaccine in, 115 (Abst.)
grass-, patients site of action of antigen D immunotherapy in, 111 (Abst.)
and nonsensitive to chemical mediators and anaphylaxis, two lines of guinea pigs (Takino et al.), 247
penicillin-, individuals, studies on histamine release from leukocytes of, *19* (Abst.)
Sensitivity, bronchial, to methacholine in asthmatic subjects free of symptoms for one to twenty-one years, 91 (Abst.)
Candida albicans, and asthma, 113 (Abst.)
contact, in guinea pig, studies on ability of soluble proteins from skin, painted in vivo with DNFB, to cause, *18* (Abst.)
induction and recall in: changes in skin and draining lymph nodes of intact and thymectomized mice, *26* (Abst.)
increased, to anaphylactic shock in guinea pigs induced by prolonged treatment with epinephrine prior to challenge (Izard et al.), 309
leukocyte, to antigenic histamine release, effect of intensive regimens of injection with allergen extracts in children on, 119 (Abst.)
and levels of blocking antibody in hay fever subjects administered Allpyral or Pollaccine, comparison: studies in pollen allergy, *18* (Abst.)
neomycin, in atopic dermatitis and other eczematous conditions, *3* (Abst.)
to proteolytic enzymes in laundry detergents (Shapiro and Eisenberg), 76
Sensitization to carrier antigens following delayed reactions to hapten, *13* (Abst.)
to enzymes in detergents (Lichtenstein et al.), 53 (Edit.)
of mice to histamine, concanavalin A–induced, *36* (Abst.)
of monkey mast cells by IgE, demonstration, 89 (Abst.)
passive, in vitro, direct demonstration of human immunoglobulin E (IgE) on rat mast cells after, 88 (Abst.)

Sensitization—Cont'd
phenomena in populations not exposed to high concentrations of enzyme dust, preliminary investigations, 97 (Abst.)
of rat mast cells with human IgE-type reagins, study on, 88 (Abst.)
Serum (sera) components, human, nonimmunologic inhibition of *B. subtilis* alkaline proteinases by, 98 (Abst.)
heterologous (rabbit) antilymphocyte, suppression by, to lymph node, thymic, and splenic lymphocytes; experimental allergic thyroiditis in rats, *30* (Abst.)
histidine levels in atopic dermatitis patients, *10* (Abst.)
IgE concentrations, value in practice of allergy, 87 (Abst.)
year-round study of, 86 (Abst.)
and passive transfer in aspirin intolerance, 109 (Abst.)
with maximal antigen neutralizing capacity, comparison of immediate "blocking" of antigenic release of histamine by, 111 (Abst.)
and nasal IgE concentrations, seasonal changes in, 87 (Abst.)
secretions and, effects of specific immunotherapy on antibodies in, 114 (Abst.)
preparations, antilymphocyte, in treatment of renal allograft rejection, *38* (Abst.)
and serum fractions of atopic individuals, studies of binding of timothy pollen antigen by, using acrylamide gel electrophoresis (Lee et al.), 321
from tuberculous and nontuberculous individuals, measurement of binding of tubercle bacilli components by antibodies in, 101 (Abst.)
Shock, anaphylactic, increased sensitivity to, in guinea pigs induced by prolonged treatment with epinephrine prior to challenge (Izard et al.), 309
Skin and draining lymph nodes of intact and thymectomized mice, changes in: induction and recall in contact sensitivity, *26* (Abst.)
reactions to dust and mites, *10* (Abst.)
reactivity, wheal and flare, differing patterns of, in patients allergic to penicillins (Van Dellen et al.), 230
studies on ability of soluble proteins from, painted in vivo with DNFB, to cause contact sensitivity in guinea pig, *18* (Abst.)
test(s), allergy, antihistamine inhibition of, 94 (Abst.)
Skin test(s)—Cont'd
in asymptomatic population prognosis of positive allergy in: three-year follow-up of college students, 93 (Abst.)
and leukocyte histamine release with antigen E, group I antigen, crude grass, and ragweed extracts, quantitative relationship between, 103 (Abst.)
technique, provocative food, evaluation, 104 (Abst.)
Smoke, cigarette, clinical hypersensitivity to, *28* (Abst.)
Smooth muscle antibody in bronchial asthma, *34* (Abst.)
respiratory, human and guinea pig: demonstration of alpha adrenergic receptors, 110 (Abst.)
South American blastomycosis, impaired delayed hypersensitivity in patients with (Mendes and Raphael), 17
Splenic, thymic, and lymph node lymphocytes, suppression by heterologous (rabbit) antilymphocyte sera to: experimental allergic thyroiditis in rats, *30* (Abst.)
Status asthmaticus, childhood, management of respiratory failure in: intravenous isoproterenol in lieu of mechanical ventilation, 112 (Abst.)
Steroid-induced mediastinal lipomatosis, *8* (Abst.)
Sting, honey bee, fluorescent antibody studies in three patients dying from (Huang et al.), 198
Streptococcal glomerulonephritis, experimental, elution of glomerular-bound antibodies in, *30* (Abst.)
Streptomycin, aminosalicylic acid, and isoniazid, experience with lymphocyte transformation tests in evaluation of allergy to, 105 (Abst.)
Sulfur colloid, technetium-99m, stabilized with gelatin, anaphylactoid reaction to, *3* (Abst.)
Swelling, facial, simulating angioneurotic edema, iodide myxedema with (Swedlund), 341 (Brief communication)
Swiss-type agammaglobulinemia in United States, *27* (Abst.)
Syncope, cough (Katz and Siegel), 346 (Correspondence)

T

Tantalum, powdered: new contrast medium for roentgenographic examination of human airways, *5* (Abst.)
Target organ, immunologic, lung as: experimental results in rabbit and guinea pig, 92 (Abst.)

XUM

Technetium-99m sulfur colloid stabilized with gelatin, anaphylactoid reaction to, *3* (Abst.)

Test(s), allergy skin, antihistamine inhibition of, 94 (Abst.)

lymphocyte transformation, experiences with in evaluation of allergy to aminosalicylic acid, isoniazid, and streptomycin, 105 (Abst.)

new, for "blocking" antibodies: detection of ragweed blocking antibodies by inhibition of ragweed-reagin–rat mast cell interaction, 120 (Abst.)

skin, in asymptomatic population, prognosis of positive allergy in: three-year follow-up of college students, 93 (Abst.)

and leukocyte histamine release with antigen E, group I antigen, crude grass, and ragweed extracts, quantitative relationship between, 103 (Abst.)

technique, provocative food skin, evaluation, 104 (Abst.)

Tetanus toxoid, intranasally administered, systemic and secretory antibody response of atopic and normal individuals to, 117 (Abst.)

Therapy, drug, pulmonary complications, *45* (Abst.)

Thymectomized and intact mice, changes in skin and draining lymph nodes of: induction and recall in contact sensitivity, *26* (Abst.)

Thymic, lymph node, and splenic lymphocytes, suppression by heterologous (rabbit) antilymphocyte sera to: experimental allergic thyroiditis in rats, *30* (Abst.)

Thymidine, ^{3}H-, uptake response of lymphocytes from patients with intrinsic asthma upon in vitro challenge with bacterial antigens, 106 (Abst.)

Thyroglobulin, human, and human and rabbit thyroid microsomal fractions, immunization of rabbits with, comparative effects of, 99 (Abst.)

Thyroid autoallergy, autoantigenic determinant groups in, 99 (Abst.)

microsomal fractions, human and rabbit, comparative effects of immunization of rabbits with human thyroglobulin and, 99 (Abst.)

Thyroiditis, experimental allergic, in rats: suppression by heterologous (rabbit) antilymphocyte sera to lymph node, thymic, and splenic lymphocytes, *30* (Abst.)

Timothy pollen antigen, studies of binding by sera and serum fractions of atopic individuals using acrylamide gel electrophoresis (Lee et al.), 321

Timothy pollen—Cont'd

extracts, dialyzable constituents of, production of reaginic antibody in monkeys following immunization with, *6* (Abst.)

Tissue(s), bronchial, from patients with asthma, immunoglobulins in, with special reference to immunoglobulin E (Callerame et al.), 187

culture rubella vaccine, canine, in dog-sensitive children, 115 (Abst.)

human, absorption of reagin by, in vitro, *46* (Abst.)

from patients with hereditary angioneurotic edema, histopathological and ultrastructural observations on (Sheffer et al.), 292

Toxoid, tetanus, intranasally administered, systemic and secretory antibody response to atopic and normal individuals to, 117 (Abst.)

Trachea, xanthogranuloma of, presenting as asthma, 102 (Abst.)

Transfer, passive, and serum IgE, in aspirin intolerance, 109 (Abst.)

Transfusion problem, difficult: anaphylactic reactions to IgA, *47* (Abst.)

Trypsin-digested, pepsin-, food antigens, reactions of antisera from orally and parenterally immunized animals with, 114 (Abst.)

Tubercle bacilli components, measurement of binding of, by antibodies in sera from tuberculous and nontuberculous individuals, 101 (Abst.)

Tuberculin hypersensitivity, in vitro lymphocyte reactivity during depression by 6-mercaptopurine, *13* (Abst.)

Tuberculous and nontuberculous individuals, measurement of binding of tubercle bacilli components by antibodies in sera from, 101 (Abst.)

Twins, monozygotic, discordant allergic manifestations in: genetic identity versus clinical, physiologic, and biochemical differences (Falliers et al.), 207

U

Urine, normal human, studies on levels of immunoglobulins in, with particular reference to IgE, *12* (Abst.)

Uveitis in association with topically administered corticosteroid, *48* (Abst.)

V

Vaccinated and naturally immune persons exposed in epidemic, reinfection of: rubella, *37* (Abst.)

Vaccination, pertussis, induction of mouse asthma after, 90 (Abst.)

Vaccine(s), bacterial, and allergenic extracts, induction of interferon by (Singer and Hardegree), 117 (Abst.); 332
canine tissue culture rubella, in dog-sensitive children, 115 (Abst.)
Vasculitis, cutaneous, caused by griseofulvin, *40* (Abst.)
Ventilation, blood gases, and exercise-induced bronchospasm in asthmatic children (Katz et al.), 148
continuous positive-pressure, in acute respiratory failure: effects on hemodynamics and lung function, *44* (Abst.)
mechanical, intravenous isoproterenol in lieu of: management of respiratory failure in childhood status asthmaticus, 112 (Abst.)
Virus, killed influenza, nasal immunization of asthmatic children with (Newcomb and Eller), 220

W

Water supplies, community, statement on question of allergy to fluoride as used in fluoridation of (Austen et al.), 347 (Edit.)
Wheal and flare skin reactivity, differing patterns of, in patients allergic to penicillins (Van Dellen et al.), 230

X

Xanthogranuloma of trachea presenting as asthma, 102 (Abst.)
X-ray resistant cell required for induction of in vitro antibody formation, *45* (Abst.)

XUM

Subject index*

A

Acetylcholine-induced sweat gland response in atopic and nonatopic subjects, effect of propranolol on, *28* (Abst.)
  response of sweat gland to, in atopic subjects, *3* (Abst.)
Addison's disease with bronchial asthma, *18* (Abst.)
Adenoidectomy and tonsillectomy, effect of, on nasopharyngeal antibody response to poliovirus, *7* (Abst.)
Adenosine-3′,5′-monophosphate (AMP), cyclic, corticosterone production in response to, of isolated adrenal cells, *29* (Abst.)
Adrenal cells, isolated, corticosterone production in response to cyclic AMP, *29* (Abst.)
  function in allergic children, effect of alternate-day steroid administration on (Easton et al.), 355
Aerometric sampling data in New Orleans asthma (Salvaggio et al.), 96
Aerosol immunization with inactivated parainfluenza type 2 vaccine, *6* (Abst.)
Airway resistance and spontaneous thoracic gas volume, analysis of relationship between, in asthmatic children (McIlreath et al.), 290
"Alcalase," antibodies to, after industrial exposure, *32* (Abst.)
Allergen extract, loss and recovery of leukocyte sensitivity to antigenic histamine release during intensive injection therapy with (May and Aduna), 313 (Brief communication)
  food, is eosinophilic gastroenteritis simple reaction to? *11* (Abst.)
  major (cod), chemical composition and immunological properties, *12* (Abst.)
  reagin mediated histamine release from monkey lung tissue, role of complement in, *40* (Abst.)
Allergic children, adrenal function in, effect of alternate-day steroid administration on (Easton et al.), 355
  reaction in ragweed asthma, location of (Hoehne and Reed), 36
Allergic—Cont'd
  respiratory disease, patterns of, in children with past history of bronchiolitis (Zweiman et al.), 283
  vascular purpura (Criep), 7
Allergy, continuing education in (Malkiel), 1
  house dust, skin window eosinophil response in (Bullock et al.), 153
  milk, milk proteins responsible for (Campbell), 230
  multiple reaginic, radioallergosorbent test in diagnosis of (Aas and Johansson), 134
  pollen, study of relationship between blocking antibody levels and symptomatic relief following hyposensitization with Allpyral in hay fever subjects, *13* (Abst.)
  practice, evaluation of IgE tests in (Henderson et al.), 361
  skin tests, positive, prognosis of, in asymptomatic population (Hagy and Settipane), 200
Allograft, skin, survival and lymphocyte cultures in patients with South American blastomycosis (Mendes et al.), 40
Allopurinol, severe hypersensitivity reactions associated with, *43* (Abst.)
Allpyral, hyposensitization with, in hay fever subjects, relationship between blocking antibody levels and symptomatic relief following, *13* (Abst.)
American Academy of Allergy, annual report of Research Council, 46
Aminophylline, immediate hypersensitivity reaction to (Wong et al.), 165 (Brief communication)
Amniotic fluid, titers of specific antiviral antibodies in, IgG levels and, *22* (Abst.)
Anaphylactic, cutaneous, and respiratory responses to Ascaris, *24* (Abst.)
  shock in rats, significance of platelet aggregation, *15* (Abst.)
Anaphylactoid purpura, elevated serum IgA globulin in, *43* (Abst.)
Anaphylaxis, cutaneous, in man, direct recovery of histamine from, *19* (Abst.)

*July, pp. 1-60; August, pp. 61-124; September, pp. 125-190; October, pp. 191-256; November, pp. 257-320; December, pp. 321-388.

Abstracts: July, pp. *1-8*; August, pp. *9-16*; September, pp. *17-24*; October, pp. *25-32*; November, pp. *33-40*; December, pp. *41-48*.

XUM

Anaphylaxis—Cont'd
production of, with ragweed in nonatopic dogs (Dhaliwal et al.), 161
Angioneurotic edema of colon, *27* (Abst.)
Announcements, 320
Antibody(ies) to "Alcalase" after industrial exposure, *32* (Abst.)
anti-IgE, skin reactivity to, and serum IgE concentrations in IgA-deficient patients, *39* (Abst.)
classes, correlation of blood eosinophilia with; studies with penicillin hypersensitivity system, *6* (Abst.)
levels, blocking, relationship to symptomatic relief following hyposensitization with Allpyral in hay fever subjects, *13* (Abst.)
maternal, in human neonatal sera, *46* (Abst.)
nasopharyngeal, response to poliovirus, effect of tonsillectomy and adenoidectomy on, *7* (Abst.)
19S, as mediators of pulmonary edema produced in rats by nephrotoxic serum, *21* (Abst.)
precipitating, to ruminant serum and milk proteins in humans with selective IgA deficiency, characterization of, *14* (Abst.)
reaginic, in adult and young mice, production and biological properties, *7* (Abst.)
synthesis, induction of, *31* (Abst.)
Antigen-antibody reactions, thromboelastographic studies on coagulation under influence of, *28* (Abst.)
bacterial, lymphocyte transformation with, in intrinsic asthma (Virtue et al.), 321
common cell surface, host immune response to, in human sarcomas, detection by cytotoxicity tests, *46* (Abst.)
D immunotherapy, site of action of (Malley et al.), 267
effect of blocking defined determinants of, in induction of antibody synthesis, *31* (Abst.)
hepatitis-associated, and cirrhosis in Uganda, *12* (Abst.)
induced peripheral blood lymphoblastoid cells, immunologic function of, *47* (Abst.)
nervous tissue, in vitro cellular responses to, in Guillain-Barré syndrome and multiple sclerosis, *47* (Abst.)
Antigenic compositions of enzyme-containing preparations of *Bacillus subtilis* origins (Debanne et al.), 212
determinants, common, in extracts of house dust and Dermatophagoides species, *3* (Abst.)
histamine release during intensive injection therapy with allergen extract, loss and recovery of leukocyte sensitivity to (May and Aduna), 313 (Brief communication)
Antilymphocyte serum, inhibition of macrophage migration by soluble factor from lymphocytes stimulated with, *36* (Abst.)
Antitrypsin globulin, alpha-1, emphysema associated with deficiency in, case presentation and review of literature, *29* (Abst.)
α_1-Antitrypsin in man (Talamo), 240
Ascaris, cutaneous, anaphylactic, and respiratory responses to, *24* (Abst.)
Asthma, absence of intestinal parasites in, *42* (Abst.)
bronchial, with Addison's disease, *18* (Abst.)
Gay's solution in treatment of (Stewart et al.), 55 (Corresp.)
and hay fever, *2* (Abst.), *18* (Abst.)
long-term effect of moving on patients with (Smith), 191
IgE levels in sera of children with, *26* (Abst.)
immunologic reactions of bronchial tissues in, *10* (Abst.)
intractable, rapid injection therapy in children with, safety and technique, *34* (Abst.)
intrinsic, lymphocyte transformation with bacterial antigens in (Virtue et al.), 321
and mites, early theory (Deamer), 251 (Corresp.)
New Orleans, relationship between hospital admission rates, pollen and fungal spore counts, and total particulate aerometric sampling data (Salvaggio et al.), 96
semiquantitative airborne spore sampling, 1967 and 1968 (Salvaggio and Seabury), 82
patients with, effect of isoproterenol or gas exchange during air and oxygen breathing in, *26* (Abst.)
ragweed, where is allergic reaction (Hoehne and Reed), 36
Asthmatic children, analysis of relationship between airway resistance and spontaneous thoracic gas volume in (McIlreath et al.), 290
distribution of histamine in blood of, effects of corticosteroids on, *21* (Abst.)
serum IgE levels in, year-round study of (Kumar et al.), 305
Atopic dermatitis, IgE in, *27* (Abst.)
disease, accumulation of eosinophils and basophils at skin sites as related to intensity of skin reactivity and symptoms in (Felarca and Lowell), 125
and nonatopic subjects, effect of propranolol on acetylcholine-induced sweat gland response, *28* (Abst.)
subjects, response of sweat gland of, to acetylcholine, *3* (Abst.)
Autoallergic disease of cattle, milk allergy, milk proteins responsible for (Campbell), 230

XUM

Autosomal dominant inheritance, isolated absence of IgA with, *48* (Abst.)

B

Bacillus subtilis origins, antigenic compositions of enzyme-containing preparations of (Debanne et al.), 212
and subtilisin, adjuvant activity of (Malkiel and Hargis), 220
Bacterial antigens, lymphocyte transformation with, in intrinsic asthma (Virtue et al.), 321
Basophils, accumulation of, at skin sites as related to intensity of skin reactivity and symptoms in atopic disease (Felarca and Lowell), 125
Beta adrenergic blockade, mechanism of bronchoconstriction due to (Grieco and Pierson), 143
Blastomycosis, South American, lymphocyte cultures and skin allograft survival in patients with (Mendes et al.), 40
Blood lymphocytes, immunoglobulin synthesis by, method of quantitation and effect of phytohemagglutinin, *23* (Abst.)
Brain damage, irreversible, oxygen toxicity in, *4* (Abst.)
Breast cancer, reduced lymphocyte transformation in, *31* (Abst.)
Bronchial asthma with Addison's disease, *18* (Abst.)
inhalation provocative tests (Spector and Farr), 121 (Corresp.)
obstructive reactions to inhalation of house dust and protective effects of disodium cromoglycate and prednisolone (Booij-Noord et al.), 344
tissues, immunologic reactions of, in asthma, *10* (Abst.)
Bronchiolitis, children with past history of, patterns of allergic respiratory disease in, 283
Bronchoconstriction due to beta adrenergic blockade, mechanism of (Grieco and Pierson), 143

C

Cancer, breast, reduced lymphocyte transformation in, *31* (Abst.)
skin reactivity in patients with; impaired delayed hypersensitivity or faulty inflammatory response, *35* (Abst.)
Cardio-Green, administration of, to uremic patients, adverse reactions to (Michie et al.), 235
Celiac disease, adult, and other forms of celiac syndrome, intestinal secretions and mucosa in patients with, *23* (Abst.)
Cells involved in immune response, *44* (Abst.)
theta-bearing and complement-receptor lymphocytes are distinct populations of, *40* (Abst.)
Cellular hypersensitivity to drugs, detection in vitro of (Rocklin and David), 276
Chemotaxis of eosinophils and neutrophils by aggregated immunoglobulins (Laster and Gleich), 297
Cirrhosis, familial, with autoimmune features and raised immunoglobulin levels, *22* (Abst.)
and hepatitis-associated antigen in Uganda, *12* (Abst.)
Coagulation, thromboelastographic studies on, under influence of antigen-antibody reactions, *28* (Abst.)
Cod as major allergen, chemical composition and immunological properties, *12* (Abst.)
Cold urticaria, immunologic characterization of serum factors responsible for (Wanderer et al.), 13
treatment of, with cyproheptadine (Wanderer and Ellis), 366 (Brief communication)
Colitis, ulcerative, family studies in, *36* (Abst.)
Colon, angioneurotic edema of, *27* (Abst.)
urticaria of, *48* (Abst.)
Complement-receptor and theta-bearing lymphocytes are distinct populations of cells, *40* (Abst.)
role of, in allergen-reagin mediated histamine release from monkey lung tissue, *40* (Abst.)
Contact dermatitis, lymphocyte cytotoxicity as possible in vitro test for, *2* (Abst.)
sensitizer (dinitrochlorobenzene) tolerance in man (Lowney), 28
unresponsiveness to, in man, *11* (Abst.)
Corticosteroids, effects of, on distribution of histamine in blood of asthmatic children, *21* (Abst.)
Corticosterone production in response to cyclic AMP in isolated adrenal cells, *29* (Abst.)
Cromoglycate, disodium, in hay fever, *10* (Abst.)
and prednisolone, protective effects of, in bronchial obstructive reactions to inhalation of house dust (Booij-Noord et al.), 344
Cutaneous anaphylaxis in man, direct recovery of histamine from, *19* (Abst.)
Cyclophosphamide, immunocyte depression induced by, in rats, *39* (Abst.)
Cyproheptadine, treatment of cold urticaria with (Wanderer and Ellis), 366 (Brief communication)
Cytotoxicity, lymphocyte, possible in vitro test for contact dermatitis, *2* (Abst.)
tests, detection of host immune response to common cell surface antigen in human sarcomas by, *46* (Abst.)

D

Dark, fewer shots in (Lowell), 53 (Edit.)
Delivery, mode of, and labor, effect of, on immunoglobulin concentrations in neonate, *30* (Abst.)

XUM

Dermatitis, atopic, IgE in, *27* (Abst.)
contact, lymphocyte cytotoxicity as possible in vitro test for, *2* (Abst.)
Dermatophagoides species and house dust, common antigenic determinants, *3* (Abst.)
Detergent, laundry, workers, sensitivity to enzyme additives in (Slavin and Lewis), 262
Dinitrochlorobenzene tolerance in man (Lowney), 28
Disease, Addison's, with bronchial asthma, *18* (Abst.)
allergic respiratory, patterns of, in children with past history of bronchiolitis (Zweiman et al.), 283
Drugs, cellular hypersensitivity to, detection in vitro of (Rocklin and David), 276
Dwarf, pituitary, mice, thymus-deficient, serum immunoglobulin levels in, *38* (Abst.)

E

Ear wax, human, demonstration and implications of lysozyme and immunoglobulins in, *30* (Abst.)
Edema, angioneurotic, of colon, *27* (Abst.)
Education in allergy, continuing (Malkiel), 1
Emphysema associated with deficiency in alpha-1 antitrypsin globulin, case presentation and review of literature, *29* (Abst.)
Enteropathy, gluten, associated with selective IgA deficiency, *44* (Abst.)
Enzyme additives, sensitivity to, in laundry detergent workers (Slavin and Lewis), 262
containing preparations of *Bacillus subtilis* origins, antigenic compositions of (Debanne et al.), 212
Eosinophils and basophils, accumulation of, at skin sites as related to intensity of skin reactivity and symptoms in atopic disease (Felarca and Lowell), 125
and neutrophils, chemotaxis of, by aggregated immunoglobulins (Laster and Gleich), 297
response, skin window, in house dust allergy (Bullock et al.), 153
Eosinophilia, blood, correlation with antibody classes; studies with penicillin hypersensitivity system, *6* (Abst.)
significance of, *20* (Abst.)
Eosinophilic gastroenteritis, simple reaction to food allergens, *11* (Abst.)
Erythrocytes coated with penicillin, hemagglutination reversal of, *5* (Abst.)

F

Family studies in ulcerative colitis, *36* (Abst.)
Farmer's lung, immunofluorescent studies in patients with (Wenzel et al.), 224
Fetal-maternal interaction and immunological memory, *37* (Abst.)
Fetal—Cont'd
thymocytes, human, response of, to PHA, *38* (Abst.)
Fluoridation of community water supplies (Waldbott), 253 (Corresp.)
Food allergens, is eosinophilic gastroenteritis simple reaction to? *11* (Abst.)
sensitivity (Tas), 122 (Corresp.)
Reply (Heiner and Goldstein), 123
Fungal and pollen spore counts in New Orleans asthma (Salvaggio et al.), 96

G

Gas volume, spontaneous thoracic, and airway resistance, analysis of relationship between, in asthmatic children (McIlreath et al.), 290
Gastroenteritis, eosinophilic, simple reaction to food allergens, *11* (Abst.)
Gay's solution in treatment of asthma (Stewart et al.), 55 (Corresp.)
Genetic analysis and serotyping in selection of related renal-allograft donors, *45* (Abst.)
Gland, sweat, response of, to acetylcholine in atopic subjects, *3* (Abst.)
Glomeruli of patients with nephrotic syndrome, IgE in, *34* (Abst.)
Gluten enteropathy associated with selective IgA deficiency, *44* (Abst.)
Guillain-Barré syndrome and multiple sclerosis, in vitro cellular responses to nervous tissue antigens, *47* (Abst.)

H

Haptenic determinant, minor, specific reagins of penicillin hypersensitivity in man, *13* (Abst.)
Hay fever and asthma, *2* (Abst.), *18* (Abst.)
long-term effect of moving on patients with (Smith), 191
disodium cromoglycate in, *10* (Abst.)
subjects, hyposensitization with Allpyral in, relationship between blocking antibody levels and symptomatic relief following, *13* (Abst.)
Hemagglutination reversal of erythrocytes coated with penicillin, *5* (Abst.)
Hepatitis-associated antigen and cirrhosis in Uganda, *12* (Abst.)
presenting as transient urticaria, *42* (Abst.)
Histamine, antigenic, release during intensive injection therapy with allergen extract, loss and recovery of leukocyte sensitivity to (May and Aduna), 313 (Brief communication)
direct recovery of, from cutaneous anaphylaxis in man, *19* (Abst.)
distribution of, in blood of asthmatic children, effects of corticosteroids on, *21* (Abst.)
release from monkey lung tissue, allergen-reagin mediated, role of complement in, *40* (Abst.)

XUM

Host immune response to common cell surface antigen in human sarcomas, detection by cytotoxicity tests, *46* (Abst.)
House dust allergy, skin window eosinophil response in (Bullock et al.), 153
and Dermatophagoides species, common antigenic determinants, *3* (Abst.)
inhalation of, bronchial obstructive reactions to, and protective effects of disodium cromoglycate and prednisolone (Booij-Noord et al.), 344
Humidifier, home furnace, hypersensitivity pneumonitis related to (Sweet et al.), 171 (Brief communication)
Hypersensitivity, immediate type, in dogs, cutaneous, anaphylactic, and respiratory responses to Ascaris, *24* (Abst.)
nasal test for, including positive reaction to lignocaine, *8* (Abst.)
pneumonitis, precipitins and diagnosis of (Fink et al.), 180 (Editorial)
related to home furnace humidifier (Sweet et al.), 171 (Brief communication)
reaction, immediate, to aminophylline (Wong et al.), 165 (Brief communication)
severe, associated with allopurinol, *43* (Abst.)
Hyperthyroidism, urticaria and pruritus uncommon manifestations of (Isaacs and Ertel), 73

I

IgA deficiency, characterization of precipitating antibodies to ruminant serum and milk proteins in humans with, *14* (Abst.)
patients, skin reactivity to anti-IgE antibody in and serum IgE concentrations, *39* (Abst.)
selective, gluten enteropathy associated with, *44* (Abst.)
globulin, elevated serum, in anaphylactoid purpura, *43* (Abst.)
isolated absence of, with autosomal dominant inheritance, *48* (Abst.)
IgE in atopic dermatitis, *27* (Abst.)
concentrations, serum, and skin reactivity to anti-IgE antibody in IgA-deficient patients, *39* (Abst.)
development in newborn human infants (Stevenson et al.), 61
in glomeruli of patients with nephrotic syndrome, *34* (Abst.)
levels in sera of children with asthma, *26* (Abst.)
serum, levels in asthmatic children, year-round study of (Kumar et al.), 305
tests, evaluation of, in allergy practice (Henderson et al.), 361
IgG levels and titers of specific antiviral antibodies in amniotic fluid, *22* (Abst.)
IgM, deficiency of, *43* (Abst.)
Immune response, cells involved in, *44* (Abst.)
host, to common cell surface antigen in human sarcomas, detection by cytotoxicity tests, *46* (Abst.)
Immunization, aerosol, with inactivated parainfluenza type 2 vaccine, *6* (Abst.)
Immunocyte depression induced by cyclophosphamide in rats, *39* (Abst.)
Immunofluorescent studies in patients with farmer's lung (Wenzel et al.), 224
Immunoglobulin A, studies on human intestinal, *30* (Abst.)
analyses of antemortem and postmortem sera, comparison, *7* (Abst.)
concentrations in neonate, effect of labor and mode of delivery on, *30* (Abst.)
levels, raised, familial cirrhosis with autoimmune features and, *22* (Abst.)
in thymus-deficient pituitary dwarf mice, *38* (Abst.)
and lysozyme in human ear wax, demonstration and implications of, *30* (Abst.)
synthesis by blood lymphocytes, method of quantitation and effect of phytohemagglutinin, *23* (Abst.)
Immunologic characterization of serum factors responsible for cold urticaria (Wanderer et al.), 13
function of antigen-induced peripheral blood lymphoblastoid cells, *47* (Abst.)
memory and maternal-fetal interaction, *37* (Abst.)
reactions of bronchial tissues in asthma, *10* (Abst.)
responsiveness, sex difference in, *11* (Abst.)
specificity of macrophage inhibition factor, *37* (Abst.)
studies in nephrotic syndrome associated with extrarenal malignant disease, *44* (Abst.)
studies in ulcerative colitis; family studies, *36* (Abst.)
Immunotherapy, antigen D, site of action of (Malley et al.), 267
Inhalation of house dust, bronchial obstructive reactions to, and protective effects of disodium cromoglycate and prednisolone (Booij-Noord et al.), 344
provocative tests, bronchial (Spector and Farr), 121 (Corresp.)
Injection therapy, intensive, with allergen extract, loss and recovery of leukocyte sensitivity to antigenic histamine release during (May and Aduna), 313 (Brief communication)
rapid, in children with intractable asthma, safety and technique, *34* (Abst.)
Intestinal parasites, absence of, in asthma, *42* (Abst.)
secretions and mucosa in patients with adult celiac disease and other forms of celiac syndrome, *23* (Abst.)

XUM

Isoproterenol or gas exchange, effect of, during air and oxygen breathing in patients with asthma, *26* (Abst.)

L

Labor and mode of delivery, effect of, on immunoglobulin concentrations in neonate, *30* (Abst.)
Laundry detergent workers, sensitivity to enzyme additives in (Slavin and Lewis), 262
Leukocyte sensitivity to antigenic histamine release during intensive injection therapy with allergen extract, loss and recovery of (May and Aduna), 313 (Brief communication)
Lignocaine, positive reaction to, as nasal test for hypersensitivity, *8* (Abst.)
Lung, farmer's, immunofluorescent studies in patients with (Wenzel et al.), 224
tissue, monkey, role of complement in allergen-reagin mediated histamine release from, *40* (Abst.)
Lupus erythematosus preparations, positive, and penicillin sensitivity (Finegold and Middleton), 115
Lymphoblastoid cells, antigen-induced peripheral blood, immunologic function of, *47* (Abst.)
Lymphocyte(s), blood, immunoglobulin synthesis by, method of quantitation and effect of phytohemagglutinin, *23* (Abst.)
cultures and skin allograft survival in patients with South American blastomycosis (Mendes et al.), 40
cytotoxicity, possible in vitro test for contact dermatitis, *2* (Abst.)
stimulated with PHA or ALS, inhibition of macrophage migration by soluble factor from, *36* (Abst.)
theta-bearing and complement-receptor, are distinct populations of cells, *40* (Abst.)
transformation with bacterial antigens in intrinsic asthma (Virtue et al.), 321
reduced, in breast cancer, *31* (Abst.)
Lysozyme and immunoglobulins in human ear wax, demonstration and implications of, *30* (Abst.)

M

Macrophage inhibition factor, immunological specificity of, *37* (Abst.)
Macrophage migration, inhibition of, by soluble factor from lymphocytes stimulated with PHA or ALS, *36* (Abst.)
Malignant disease, extrarenal, associated with nephrotic syndrome, immunological studies in, *44* (Abst.)
Maternal antibodies in human neonatal sera, *46* (Abst.)
fetal interaction and immunological memory, *37* (Abst.)
Milk allergy, milk proteins responsible for (Campbell), 230
proteins responsible for milk allergy (Campbell), 230
and ruminant serum, characterization of precipitating antibodies to, in humans with selective IgA deficiency, *14* (Abst.)
Mites and asthma, early theory (Deamer), 251 (Corresp.)
Moving, long-term effect of, on patients with asthma and hay fever (Smith), 191

N

Name, our new (Mathews), 51 (Edit.)
Nasal test for hypersensitivity, including positive reaction to lignocaine, *8* (Abst.)
Nasopharyngeal antibody response to poliovirus, effect of tonsillectomy and adenoidectomy on, *7* (Abst.)
Neonatal sera, human, maternal antibodies in, *46* (Abst.)
Neonate, immunoglobulin concentrations in, effect of labor and mode of delivery on, *30* (Abst.)
Nephrotic syndrome associated with extrarenal malignant disease, immunological studies in, *44* (Abst.)
IgE in glomeruli of patients with, *34* (Abst.)
Nephrotoxic serum, 19S antibodies as mediators of pulmonary edema produced in rats by, *21* (Abst.)
New Orleans asthma, relationship between hospital admission rates, pollen and fungal spore counts, and total particulate aerometric sampling data (Salvaggio et al.), 96
semiquantitative airborne spore sampling, 1967 and 1968 (Salvaggio and Seabury), 82
Nervous tissue antigens, in vitro cellular responses to, in Guillain-Barré syndrome and multiple sclerosis, *47* (Abst.)
Neutrophils and eosinophils, chemotaxis of, by aggregated immunoglobulins (Laster and Gleich), 297

Open-heart surgery, oxygen toxicity after, *4* (Abst.)

XUM

Oxygen toxicity in irreversible brain damage, *4* (Abst.)
after open-heart surgery, *4* (Abst.)

P

Parainfluenza type 2 vaccine, inactivated, aerosol immunization with, *6* (Abst.)
Penicillin, erythrocytes coated with, hemagglutination reversal of, *5* (Abst.)
hypersensitivity, correlation with blood eosinophilia, *6* (Abst.)
in man, specific reagins of, minor haptenic determinant, *13* (Abst.)
sensitivity and positive lupus erythematosus preparations (Finegold and Middleton), 115
skin testing on inpatient service, routine use of, *35* (Abst.)
Study Group, American Academy of Allergy, report of (Green and Rosenblum), 331
Phytohemagglutinin, effect of, on immunoglobulin synthesis by blood lymphocytes, *23* (Abst.)
inhibition of macrophage migration by soluble factor from lymphocytes stimulated with, *36* (Abst.)
response to, of human fetal thymocytes, *38* (Abst.)
Pituitary dwarf mice, thymus-deficient, serum immunoglobulin levels in, *38* (Abst.)
Platelet aggregation in anaphylactic shock in rats, significance of, *15* (Abst.)
Pneumonitis, hypersensitivity, precipitins and diagnosis of (Fink et al.), 180 (Editorial)
related to home furnace humidifier (Sweet et al.), 171 (Brief communication)
Poliovirus, nasopharyngeal antibody response to, effect of tonsillectomy and adenoidectomy on, 7 (Abst.)
Pollen allergy, study of relationship between blocking antibody levels and symptomatic relief following hyposensitization with Allpyral in hay fever subjects, *13* (Abst.)
and fungal spore counts in New Orleans asthma (Salvaggio et al.), 96
grains, inhaled, deposition of, in lower respiratory tract of guinea pig (Hobday and Townley), 254 (Corresp.)
Precipitins and diagnosis of hypersensitivity pneumonitis (Fink et al.), 180 (Editorial)
Prednisolone and disodium cromoglycate, protective effects of, in bronchial obstructive reactions to inhalation of house dust (Booij-Noord et al.), 344
Presidential address: continuing education in allergy (Malkiel), 1
Progesterone urticaria, autoimmune (Farah and Shbaklu), 257
Propranolol, effect of, on acetylcholine-induced sweat gland response in atopic and nonatopic subjects, *28* (Abst.)
Proteins, milk, responsible for milk allergy (Campbell), 230
Pruritus and urticaria, uncommon manifestations of hyperthyroidism (Isaacs and Ertel), 73
Pulmonary edema produced in rats by nephrotoxic serum, 198 antibodies as mediators of, *21* (Abst.)
Purpura, allergic vascular (Criep), 7
anaphylactoid, elevated serum IgA globulin in, *43* (Abst.)

R

Rabies prophylactic therapy, case report and review of literature, *19* (Abst.)
Radioallergosorbent test in diagnosis of multiple reaginic allergy (Aas and Johansson), 134
Ragweed asthma, where is allergic reaction (Hoehne and Reed), 36
production of anaphylaxis with, in nonatopic dogs (Dhaliwal et al.), 161
Reagin-allergen mediated histamine release from monkey lung tissue, role of complement in, *40* (Abst.)
mediated reactions, experimental inhibition of, *45* (Abst.)
Reaginic antibody in adult and young mice, production and biological properties, *7* (Abst.)
Renal-allograft donors, selection of, serotyping and genetic analysis in, *45* (Abst.)
Research Council, annual report, 46
Respiratory disease, allergic, patterns of, in children with past history of bronchiolitis (Zweiman et al.), 283
tract of guinea pig, deposition of inhaled pollen grains in (Hobday and Townley), 254 (Corresp.)
Ruminant serum and milk proteins, characterization of precipitating antibodies to, in humans with selective IgA deficiency, *14* (Abst.)

S

Sarcomas, human, host immune response to common cell surface antigen, detection by cytotoxicity tests, *46* (Abst.)
Sclerosis, multiple, and Guillain-Barré syndrome, in vitro cellular responses to nervous tissue antigens, *47* (Abst.)
Sensitizer, contact (dinitrochlorobenzene), tolerance in man (Lowney), 28
unresponsiveness to, in man, *11* (Abst.)
Serotyping and genetic analysis in selection of related renal-allograft donors, *45* (Abst.)

XUM

Serum factors responsible for cold urticaria, immunologic characterization of (Wanderer et al.), 13
immunochemical studies of, *23* (Abst.)
Sex difference in immunologic responsiveness, *11* (Abst.)
Shock, anaphylactic, in rats, significance of platelet aggregation, *15* (Abst.)
Shots in dark, fewer (Lowell), 53 (Edit.)
Skin allograft survival and lymphocyte cultures in patients with South American blastomycosis (Mendes et al.), 40
reaction, delayed, separation of material in streptokinase-streptodornase which induces (Taylor et al.), 23
reactivity to anti-IgE antibody and serum IgE concentrations in IgA-deficient patients, *39* (Abst.)
in patients with cancer; impaired delayed hypersensitivity or faulty inflammatory response, *35* (Abst.)
and symptoms in atopic disease, accumulation of eosinophils and basophils at skin sites as related to (Felarca and Lowell), 125
testing, penicillin, on inpatient service, routine use of, *35* (Abst.)
tests, allergy, positive, prognosis of, in asymptomatic population (Hagy and Settipane), 200
window eosinophil response in house dust allergy (Bullock et al.), 153
Smallpox vaccination, 1968, complications of, results of ten statewide surveys, *15* (Abst.)
South American blastomycosis, lymphocyte cultures and skin allograft survival in patients with (Mendes et al.), 40
Streptodornase-streptokinase, separation of material in, which induces delayed skin reaction (Taylor et al.), 23
Streptokinase-streptodornase, separation of material in, which induces delayed skin reaction (Taylor et al.), 23
Steroid administration, alternate-day, effect on adrenal function in allergic children (Easton et al.), 355
Subtilisin and *Bacillus subtilis*, adjuvant activity of (Malkiel and Hargis), 220
Sweat gland, response of, to acetylcholine in atopic subjects, *3* (Abst.)
induced, in atopic and nonatopic subjects, effect of propranolol on, *28* (Abst.)

T

Theta-bearing and complement-receptor lymphocytes are distinct populations of cells, *40* (Abst.)
Thoracic gas volume, spontaneous, and airway resistance, analysis of relationship between, in asthmatic children (McIlreath et al.), 290
Thromboelastographic studies on coagulation under influence of antigen-antibody reactions, *28* (Abst.)
Thymocytes, human fetal, response of, to PHA, *38* (Abst.)
Thymus-deficient pituitary dwarf mice, serum immunoglobulin levels in, *38* (Abst.)
Tonsillectomy and adenoidectomy, effect of, on nasopharyngeal antibody response to poliovirus, *7* (Abst.)
Tricarbocyanine dye (Cardio-Green), administration of, to uremic patients, adverse reactions associated with (Michie et al.), 235

U

Ulcerative colitis, family studies in, *36* (Abst.)
Uremic patients, adverse reactions associated with administration of Cardio-Green to (Michie et al.), 235
Urticaria, autoimmune progesterone (Farah and Shbaklu), 257
cold, immunologic characterization of serum factors responsible for (Wanderer et al.), 13
treatment of, with cyproheptadine (Wanderer and Ellis), 366 (Brief communication)
of colon, *48* (Abst.)
and pruritus, uncommon manifestations of hyperthyroidism (Isaacs and Ertel), 73
transient, hepatitis presenting as, *42* (Abst.)

V

Vaccination, smallpox, 1968, complications of, results of ten statewide surveys, *15* (Abst.)
Vaccine, inactivated parainfluenza type 2, aerosol immunization with, *6* (Abst.)
Vascular purpura, allergic (Criep), 7

W

Water supplies, community, fluoridation of (Waldbott), 253 (Corresp.)
Wax, ear, human, demonstration and implications of lysozyme and immunoglobulins in, *30* (Abst.)
